## Class Size Initiative

Every year, the Alberta Education asks school authorities to post on their website the average student/teacher ratio per category and per school. The Board has met and exceeded the recommended class size in three categories, but as with the majority of school boards, the average class size for K-3 is slightly higher than the recommended average due to the very small classes in schools outside Edmonton. Still, since the inception of class size funding in 2005/2005, the Board has reached, for the first time, the lowest class sizes in grades K-3.
